CATARRH.

THIS DANGEROUS MALLADY, THE forerunner of Deafness and Consumption, is so prevalent in this section of Nevada that we feel constrained to give the subject more than a passing notice

notice

Catarrh is one of the most frequent causes of deafness. carrely any one afflicted with this diseas for any length of time retains a normal acuseness of hearing power. With some, the hearing power. With some, the hearing power with some accession of cold, or sopped up when blowing the nose; but by degrees these spells of deafness occur oftener and last longer, until at length the hearing becomes permanantly impaired. In others the haring grows indistinct without the appearance of any premonitary symptoms, and the deafness increases steadily until all useful hearing is lost. Notices in the head similar to the escape of steam, the roaring of the cean, the ringing of bells, the singing of the lear-kettle, and, in fact, all conceivable sounds at times are neard, which add materially to the existing distress. The disease spreads from organ to organ, in adding the throat, laryex, traches and bronchial tubes, until encroaching further and further, it reaches the finer ramifications of the bronchi, when a slight impuse is needed to send it to the lung tissue. Experience has proven that in a majority of cases, has a catarrh becomes the starting point of consumptive devel pment, the disease being transmitted to the lungs both by a nervous connection and a continuity of surface, and so frequently has this course been not leed that massi ca arrh is now regarded as a premonition and one of the earliest manife tations of consumption.

By scientific research it has been discovered that the horrible disease in
